

TRAUMA AND ORTHOPAEDICS with SURGERY

IN BRIEF:

- You will be taught by consultant surgeons and other specialists in practice, with surgical simulation sessions at MediaCityUK
- Gain an orthopaedic and trauma focus with hands-on surgical skills workshops and a clinical case approach
- A number of specialist workshops will take place in the new University campus at MediaCityUK including surgical simulation sessions.
- Work placement opportunity
- Clinical placement opportunity
- International students can apply

COURSE SUMMARY

This course has been produced in consultation with clinical specialists to ensure that it provides the appropriate content for orthopaedic trainees and advanced therapists to progress in orthopaedics in the current climate. Not only will you have input from our own, highly experienced staff, you will also be taught by clinical experts who are in current practice.

Key lectures and case discussion sessions will be delivered on campus days by the consultant faculty, who will also guide the learning element of the course. This course will also give you access to expertise in clinical assessment, rehabilitation, spinal pathology and biomechanics as well as specialist surgical skills workshops.

AWARDS AND ACCREDITATION

COURSE DETAILS

The course runs full-time over one year:

- Postgraduate Certificate: two modules
- Postgraduate Diploma: four modules
- Masters: four modules plus a dissertation

Observational clinical placements in hospitals and sports clubs are arranged for full-time students in the specialist areas of spinal orthopaedics, lower limb orthopaedics and upper limb orthopaedics.

- Professional and Business Management for Health Professionals (30 credits)

ENTRY REQUIREMENTS

Applicants should be doctors with MBBCh or equivalent,

Prospective students will usually be required to have achieved a 2.1 Honours Degree, but consideration will be given to students with a 2.2 Honours Degree with appropriate experience and satisfactory references.

ENGLISH LANGUAGE REQUIREMENTS

Students whose first language is not English will be required to demonstrate proficiency in English – IELTS – a minimum overall score of 6.5 with no component below 6 is required.

SUITABLE FOR

This course is aimed at medical orthopaedic trainees, GPs and specialist orthopaedic therapists.

APPLICANT PROFILE

This course is particularly relevant to those taking on new responsibilities in orthopaedic assessment and patient management as a result of the modernisation agenda. You will want to:

- Use advanced clinical reasoning skills in the assessment and management of orthopaedic and sports trauma patients
- Explore current advances in orthopaedics and sports trauma and how this applies to your own practice
- Develop a critical approach to the evidence base
